

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

<i>The American Physiological Society:</i> PROFESSOR CHAS. W. GREENE	

MSS. intended for publication and books, etc., intended for review should be sent to Professor J. McKeen Cattell, Garrison-on-Hudson, N. Y.

UPBUILDING NATIONAL VITALITY— THE NEED FOR A SCIENTIFIC INVESTIGATION¹

IF American democracy is to survive, it must be made more efficient—socially, industrially, politically. If Americans are to work out their national destiny unvexed and unhampered by foreign interference or domination, they must no longer endure the hazard of unguarded peace.

These conclusions—right or wrong—have been firmly fixed in the minds and hearts of a vast number of Americans.

For many months they have observed the great Christian nations of Europe rending one another with the ferocity of wild beasts—a savage, brutalizing struggle to destroy life and property, to increase human pain and suffering. The awful horror of it, the appalling cost of it in men, money and misery has passed beyond the grasp of the imagination.

Civilization's guarantees against such a man-made calamity have been dishonored, treaties torn up, the laws of common humanity and of God designedly outraged, and the rule of the sword substituted.

On one flank America has this extraordinary recrudescence of the spirit of national outlawry and conquest. On the other it has a rapidly advancing military power supported by an aggressive, warlike people with colonizing policies.

The possibility that American democracy may eventually be squeezed or crushed between these two great forces of militarism can no longer be ignored.

¹ Address of the chairman and retiring vice-president of Section I, the American Association for the Advancement of Science, Columbus, December 29, 1915.
